• Create A Culture Of Health
• Online Resources
WHAT IS EMPOWERED TO SERVE?

EmPOWERED to Serve is a movement inspiring those who are passionate about driving change through health justice in their communities. We are catalysts for change, empowering the equity equation.

AHA’s Mission Statement:
To be a relentless force for a world of longer, healthier lives.

Amgen proudly supports the American Heart Association’s EmPOWERED to Serve Initiative
LEARN ALL YOU CAN ABOUT HEART ATTACK

about every 40 seconds an American has a heart attack
THE GOOD NEWS

Every year, tens of thousands of Americans survive heart attack and go back to work and enjoy a normal life.
PROGRAM OBJECTIVES

By the end of this lesson, you’ll be able to share with your family and friends:

- Some of the causes and warning signs of heart attack
- What to do if you think someone is having a heart attack
- The differences between a heart attack and cardiac arrest
HEART DISEASE IS...

The #1 Killer for All Americans

1 in 4 African-Americans die from heart disease.

1 in 6 American Indians and Alaska Natives die from heart disease.

1 in 5 Latinos die from heart disease.
POINT 1: LEARN THE WARNING SIGNS OF A HEART ATTACK

- Discomfort in the center of the chest that:
  - Feels like uncomfortable pressure, squeezing, fullness, or pain
  - Lasts more than a few minutes
  - Goes away and comes back

- Pain or discomfort in one or both arms, the back, neck, jaw, or stomach

- Shortness of breath, with or without chest discomfort

- Breaking out in a cold sweat, nausea, and feeling light-headed
WARNING SIGNS MAY DIFFER IN WOMEN

Women can experience a heart attack without chest pressure.

The more common symptoms in women may be:

- Shortness of breath
- Nausea/vomiting
- Pressure in lower chest/upper abdomen
- Jaw, neck or upper back pain
- Dizziness
- Light-headedness
- Extreme fatigue
VIDEO: SIGNS OF A HEART ATTACK

Amgen proudly supports the American Heart Association’s EmPOWERED to Serve Initiative
WHAT CAUSES A HEART ATTACK?

Coronary arteries supply blood and oxygen to the muscles of the heart.
IS IT A HEART ATTACK OR CARDIAC ARREST?

Heart attack is a circulation problem. Blood flow to the heart is blocked.

Cardiac arrest is an electrical problem. The heart malfunctions and suddenly stops beating unexpectedly.

A heart attack may CAUSE cardiac arrest.
LEARN THE WARNING SIGNS OF CARDIAC ARREST

• **Sudden loss of responsiveness**
  The person doesn’t respond, even if you tap them hard on the shoulders, or loudly ask if they are OK. The person does not move, speak, blink or otherwise react.

• **No normal breathing**
  The person isn’t breathing or is only gasping for air.
LEARN THE WARNING SIGNS OF CARDIAC ARREST

What to do:

• **Call 9-1-1** (or send someone to do that)

• Give **Hands-Only™ CPR**: Push hard and fast in the center of the chest

• **Whoever calls 911 should stay on the phone** until the 911 dispatcher says that it’s OK to hang up
POINT 2: DON’T WAIT TO CALL 9-1-1

Minutes matter. Fast action can save lives.

• **Call 911** – This is the fastest way to get lifesaving treatment

• Emergency medical services staff can begin treatment as soon as they arrive
Many people wait before getting help.

Some people may feel it would be embarrassing to have a “false alarm.”

Others may be so afraid of having a heart attack that they tell themselves they aren’t having one.
WORRY ABOUT CALLING 9-1-1?

Many people wonder:

- Do I need to pay up front for the ambulance?
- Will I get in trouble?
- Do I need an ID card for emergency medical services to help me?

No. Don’t wait to call 911.
TAKE THESE STEPS TODAY

Before there is an emergency...

• Learn the symptoms of a heart attack
• Find out what hospitals in your area have 24-hour emergency cardiac care
• Remember you should always call 911 in an emergency, including situations in which someone is unresponsive and not breathing normally or only gasping
POINT 3: EMBrACE LIFE’S ESSENTIAL 8™ TO REDUCE RISK

1. Get Active

2. Eat Better: Choose foods that are low in saturated fat, trans fat, cholesterol, and salt.

3. Lose Weight: And keep your weight under control.

4. Stop Smoking: And avoid other people’s tobacco smoke.

5. Control Cholesterol

6. Control Blood Pressure: And treat high blood pressure if you have it.

7. Reduce Blood Sugar: And control your blood sugar if you have diabetes.

8. Get Adequate Sleep: Most adults need 7-9 hours of sleep each night. Children require more and varies depending on their age.
CALL TO ACTION

• Learn the warning signs of a heart attack and cardiac arrest

• If you see someone with the warning signs of a heart attack or cardiac arrest, call 911 immediately

• Embrace Life’s Simple 7® to reduce risk
YOUR VOICE MATTERS

We all have the power to make a difference by speaking out for policies that help build healthier communities and healthier lives.
